Rental Search Assistance

Description

The focus of Rental Search Assistance is finding a new staff member and their family a house, apartment or condo to rent in a neighborhood, and with the amenities, which match their specific requirements. Research on any questions regarding the lease is also included in this service.

Audience

This service may be of interest to new staff members and their families who have made the decision to move to Edmonton and wish to rent a home rather than purchase.

Process

Based on the new staff member's rental requirements, Community Compass will search online rental databases, local papers and access contacts to compile a qualified list of properties. Representatives from Community Compass will make appointments, set up an itinerary of viewings and accompany the new staff member to the viewings. This service can be customized to meet the needs of the new staff member.

"People who have moved to Edmonton often only understand what a great place it is to live after two or three years. What we do is shorten that process by helping them to get to know the city intimately right off the bat."
