‘Your Edmonton’

Observer

Description

The Observer provides an informative 2 to 3 hour tour of the city, focusing on the participant’s particular interests. Participants may choose either a lifestyle tour or a community tour. During the tour, Community Compass will answer questions, helping participants understand what Edmonton has to offer. A general information package will round out an excellent overview of the city.

Audience

This service may be of interest to candidates at the time of their interview or can be arranged for a subsequent trip. It can also provide an easy and convenient way for new families to assess the lifestyle that awaits them in Edmonton either prior to, or shortly after their move.

Process

Representatives from Community Compass will meet the participants at a pre-determined location and return them to a location of their choice.

“We are a local consulting company that takes pride in introducing job candidates, or new employees and their families, to Edmonton and surrounding communities.”
